Lifeline AEDs

in a class all their own

As the scholastic year draws to a close, planning for the back-to-school season should include the safety of students, academic staff, parents, and visitors in the event of sudden cardiac arrest.

Readily accessible automated external defibrillators (AEDs), strategically placed throughout an institution's campus, athletic fields, etc., can make the difference in the crucial minutes between a victim's collapse and the arrival of emergency medical services.

With industry leading innovation, simplicity, and elegance, Defibtech provides value-oriented AEDs that are so easy to use, virtually anyone can be a lifesaver.

- **The Lifeline AED was the most successfully used AED in a study of minimally trained users¹**
- **Actively illuminated status indicator and frequent and automatic self-tests for easy maintenance**
- **Robust, dust protected, and spray / water resistant**
- **8-year limited warranty**
- **Award-winning design: Lightweight; durable; fully integrated**
- **Designed and factory-assembled in the USA**
